

Press Release

4M Emergency Systems Chooses Anodyne's BI Solutions

Atlanta, GA. – May 30, 2008 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced that their business intelligence (BI) solutions will be implemented at 4M Emergency Systems (4M) located in Hudson, Ohio. By utilizing Anodyne's analytics tools, 4M will gain a deeper understanding into their revenue cycle.

4M was founded in 1992 and is a leading provider of Emergency Physician Staffing. Today, its 63 physicians provide high quality services at 14 locations throughout Ohio and West Virginia. These physicians are committed to excellence in Emergency Medicine and strive to continuously improve the care of their patients. Lori Anderson-Printy, CEO of 4M Emergency Systems said, "Anodyne's business intelligence solutions will bring us significantly improved capabilities in analyzing our revenue cycle processes."

Anodyne's ad-hoc analytics tools allow users to interact directly with their revenue cycle data without relying on IT or technically-oriented resources. With lightning fast query performance, business professionals gain access to desired information within seconds. This data is presented in the form of rich data visualizations that expose trends, patterns, and meaningful insights. Michael Funk, CEO of Anodyne Health said, "By using our BI solutions, 4M will have unprecedented visibility into their revenue cycle. We are excited at the opportunity to work with Lori and her team."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
