

Press Release

BJC Medical Group Selects Anodyne Health

Atlanta, GA. – March 4, 2009 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced that their business intelligence (BI) solutions will be implemented at BJC Medical Group, located in St. Louis, Missouri. BJC Medical Group was looking for a solution that would expand and improve their access to revenue cycle and physician productivity data.

BJC Medical Group, an integrated group practice comprising 183 primary care physicians, pediatricians, and obstetricians, was established as part of BJC Healthcare in 1995. The physicians within this medical group are devoted to providing exceptional medical care to their patients in the Greater St. Louis area. Today, BJC Healthcare continues to be one of the largest nonprofit health care organizations in the country.

Anodyne's ad-hoc analytics solution allows business professionals with healthcare organizations to interact directly with their data, through a "self-service" model, minimizing the need for support from IT personnel or analysts. With extremely fast response-times, users are able to access desired information within seconds. "By utilizing Anodyne Analytics™, BJC Medical Group will be able to quickly and easily identify trends and patterns within their revenue cycle. This will help drive continuous quality improvement across their entire organization," commented Michael Funk, CEO of Anodyne Health. "We are very excited about beginning a business relationship with such a respected physician organization."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding, and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk, and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use, web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
