

Press Release

CardioVascular Associates Selects Anodyne Health

Atlanta, GA. – November 13, 2008 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced today that its business intelligence (BI) solutions will be implemented at CardioVascular Associates (CVA), located in Louisville, Kentucky. By utilizing Anodyne's BI solutions, CVA will have unparalleled visibility into all areas of their revenue cycle allowing them to manage their practice more effectively.

CVA is one of the largest and most respected cardiovascular practices in Louisville and the surrounding region. Combined, CVA's 22 dedicated physicians have expertise in all areas of cardiology. Janee Williams, CPA, Business Office Manager of CardioVascular Associates said, "One of the things that we are most excited about as we begin to work with Anodyne Health is to have a tool that will allow us to easily and quickly analyze our practice. Anodyne's great depth of reporting gives us great confidence that we will have accurate, timely, and highly actionable information to monitor and improve the metrics of our group."

"Anodyne's BI solutions will put information at the fingertips of the CVA management team," commented Michael Funk, CEO of Anodyne Health. "As a result of implementing our BI solutions, CVA should be able to significantly compress their analytical cycle and transform the way their management team works with the practice's business data".

About Anodyne Health

Anodyne Health (www.anodynehealth.com) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
