

Press Release

Cardiovascular Consultants of North Texas Partners with Anodyne Health

Atlanta, GA. – July 10, 2009 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, has recently partnered with Cardiovascular Consultants of North Texas, located in Carrollton, Texas. By utilizing Anodyne's business intelligence (BI) solutions, Cardiovascular Consultants of North Texas will gain unprecedented visibility into all areas of their revenue cycle helping them to drive improved business results.

"As a group of Cardiologists in a very competitive market, it is important to be able to access practice data and make informed decisions. Anodyne will give us the ability to obtain information in the format we are looking for with minimal amount of effort. We are excited about the possibilities that Anodyne's functionality will give us. I believe that data, and not emotion, should be the foundation for decision making, and Anodyne will provide the data," stated Bill Mercy, Administrator of Cardiovascular Consultants of North Texas.

"Anodyne's ad-hoc analysis tools will allow the business users at Cardiovascular Consultants of North Texas to interact directly with their data without the need for support from IT personnel or analysts. Now, they will be able to more quickly identify revenue cycle opportunities across their entire organization," commented Michael Funk, CEO of Anodyne Health. "We look forward to working with such a respected physician group."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) is a leading provider of Business Intelligence (BI) solutions for healthcare provider organizations. The company's unique, easy-to-use, web-based BI software, which includes both an ad-hoc analytics and a dashboard application, revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain. Anodyne's end-to-end solutions are delivered through a low-risk, Software-as-a-Service business model, where the data extraction, hosting, training, support, security, and disaster recovery are all managed by Anodyne.
