

## Press Release

### Cardiovascular Institute of the South Partners with Anodyne Health

**Atlanta, GA. – July 1, 2008** – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, recently partnered with Cardiovascular Institute of the South (CIS) located in Southern Louisiana. CIS chose Anodyne's business intelligence (BI) solutions for their ease-of-use and ability to produce rich revenue cycle data visualizations.

CIS is one of the nation's most respected groups of cardiologists, cardiovascular surgeons, and thoracic surgeons. Together, these 49 physicians represent almost every specialty in heart and vascular medicine. CIS has not only made noteworthy contributions to the development of non-surgical treatments for cardiovascular disease, but they are also a world leader in treating peripheral arterial disease. The exceptional care provided by CIS is world renowned.

"We chose Anodyne because its applications are so easy to use. Right now our data team gets bombarded with requests for information and Anodyne Analytics™ will give us the ability to give everyone access to the data they need. This will solve a lot of problems," stated Danica Colwart, Senior Data Analyst at Cardiovascular Institute of the South. "I also think having information displayed graphically will be very powerful."

"The rich data visualizations that Anodyne's BI solutions quickly produce will allow Cardiovascular Institute of the South to easily identify trends and analyze how they are performing. This insight will allow them to become more competitive and enable them to thrive in an ever-changing healthcare environment," commented Michael Funk, CEO of Anodyne Health.

#### About Anodyne Health

Anodyne Health ([www.anodynehealth.com](http://www.anodynehealth.com)) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
