

Press Release

DuPage Medical Group Selects Anodyne Health

Atlanta, GA. – July 15, 2009 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced that its business intelligence (BI) solutions will be implemented at DuPage Medical Group, a physician-owned, multi-specialty group, located in the greater Chicago area. DuPage Medical Group selected Anodyne's BI solutions for their ability to quickly produce rich, graphical visualizations of revenue cycle data.

DuPage Medical Group employs over 280 physicians that provide quality, comprehensive healthcare to their patients from 36 locations throughout DuPage, Kane, and Will Counties. These physicians use state-of-the-art equipment and advanced technology to guarantee that their patients always receive the best care available.

"The main reason DuPage Medical Group chose to go with the Anodyne product is because of the ability of the product to take a controlled data set with consistent parameters across our medical group and give the users an ability to answer definitive questions related to the revenue cycle in an efficient manner," stated Mike Pacetti, Chief Financial Officer of DuPage Medical Group. "We also chose the product as a mechanism to standardize revenue cycle reporting across our medical group."

"Our cutting-edge BI solutions will make the business professionals at DuPage Medical Group more productive while dramatically reducing the interdependency within their organization to answer business questions, both simple and complex," stated Michael Funk, Chief Executive Officer of Anodyne Health. "We are pleased to add another highly respected provider organization as an Anodyne client."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) is a leading provider of Business Intelligence (BI) solutions for healthcare provider organizations. The company's unique, easy-to-use, web-based BI software, which includes both an ad-hoc analytics and a dashboard application, revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain. Anodyne's end-to-end solutions are delivered through a low-risk, Software-as-a-Service business model, where the data extraction, hosting, training, support, security, and disaster recovery are all managed by Anodyne.
