

## Press Release

### Harbin Clinic Chooses Anodyne Health

**Atlanta, GA. – June 15, 2009** – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced that its business intelligence (BI) solutions will be implemented at Harbin Clinic, located in Georgia. Harbin Clinic chose Anodyne's BI solutions for their ability to quickly present relevant revenue cycle data.

Harbin Clinic provides the highest quality of care to its patients from 20 different locations throughout Northwest Georgia. "With nearly 200 providers, Harbin Clinic is the largest privately owned multi-specialty physician group in Georgia. As our business has become more complex, we needed a reporting tool to provide quick and complete ad hoc reporting," stated Tom Diehl, Chief Financial Officer of Harbin Clinic. "We believe Anodyne will provide an easy, efficient way to obtain relevant data in a manner that enhances improved decision making, strategic planning, and best practices. The tools provided can be utilized by front-line managers and executives, as well as physicians."

"Our cutting-edge BI solutions will make the business professionals at Harbin Clinic more productive while dramatically reducing the interdependency within their organization to answer business questions, both simple and complex," stated Michael Funk, Chief Executive Officer of Anodyne Health. "We are pleased to add another highly respected provider organization as an Anodyne client."

#### About Anodyne Health

Anodyne Health ([www.anodynehealth.com](http://www.anodynehealth.com)) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding, and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk, and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use, web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
