

## Press Release

### Hematology-Oncology Associates of CNY Partners with Anodyne Health

**Atlanta, GA. – October 28, 2008** – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, recently partnered with Hematology-Oncology Associates of CNY, located in East Syracuse, New York. Hematology-Oncology Associates of CNY chose Anodyne's business intelligence (BI) solutions for their ease-of-use and ability to produce rich revenue cycle data visualizations.

Hematology-Oncology Associates of CNY provides care to patients dealing with cancer and blood disorders. In 2003, their state of the art, comprehensive cancer center was opened. Today, it continues to provide full service medical and radiation oncology treatments, diagnostic testing, support, and complementary services to all of its patients. Jean Barrows, Head of Billing Operations at Hematology-Oncology Associates of CNY said, "By utilizing Anodyne's BI solutions, we will have the ability to quickly manipulate data on the fly. Their application will let us filter down to any data element we need, including and excluding certain elements when necessary."

"The rich presentation of data within our ad hoc analytics application will enable Hematology-Oncology Associates of CNY to easily spot trends and identify patterns. This insight will allow them to become more competitive and drive better financial results in the ever-changing healthcare environment," commented Michael Funk, CEO of Anodyne Health.

#### About Anodyne Health

Anodyne Health ([www.anodynehealth.com](http://www.anodynehealth.com)) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
