

Press Release

Huntington Internal Medicine Group Partners with Anodyne Health

Atlanta, GA. – March 31, 2008 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, has recently partnered with Huntington Internal Medicine Group (HIMG) located in Huntington, West Virginia. HIMG selected Anodyne's business intelligence (BI) solutions, for their ability to produce rich visualizations of very precise revenue cycle data streams.

HIMG is widely considered to be the premier group practice in Huntington, West Virginia and the surrounding tri-state area. Their physicians are specialists in internal medicine, as well as its various subspecialties. HIMG recently opened one of the most unique healthcare facilities in the United States. They created a "medical mall" where its 60 plus providers not only supply outstanding care, but offer continuing education classes, exercise classes, and free healthcare screenings to their community.

Mark Morgan, Huntington Internal Medicine Group's Chief Administrative Officer said, "We like how Anodyne's BI solutions give us flexibility in managing our revenue cycle data. We also like how functional the graphic visualizations make that data." Anodyne's business intelligence tools allow business users to gain total command of performance across the entire revenue cycle continuum without the involvement of IT resources.

Anodyne's BI solutions were developed so that business professionals within healthcare would be able to directly access rich and actionable information, without the help of IT resources," stated Michael Funk, CEO of Anodyne Health. "By using Anodyne's tools, Huntington Internal Medicine Group will significantly increase the visibility they have into their revenue data."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
