

Press Release

Kernodle Clinic Partners with Anodyne Health

Atlanta, GA. – September 23, 2008 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, recently partnered with Kernodle Clinic, a multi-specialty group practice located in Burlington, North Carolina. Kernodle Clinic was looking for a solution that would give them heightened visibility into their revenue cycle data without the need to rely on internal IT resources.

Kernodle Clinic is a multi-specialty group practice with more than 50 medical providers in 15 areas of specialty - the only such practice serving the Burlington / Alamance County area. Founded in 1949, Kernodle Clinic is said to be one of the most modern and best-equipped facilities of its kind in the south. "Anodyne Analytics™ will allow us to have flexibility when evaluating our data," said Mike Lunceford, Associate Administrator of Kernodle Clinic. "We can analyze our data in multiple ways by using a few simple mouse clicks. I won't have to go to my IT department and request reports anymore."

"With Anodyne's BI solutions, it is very easy to produce actionable information across the entire revenue cycle continuum. This will allow Kernodle Clinic to make better, more informed decisions," commented Michael Funk, CEO of Anodyne Health. "By putting information at the fingertips of Kernodle's management team, we will afford them the opportunity to drive continuous improvement into the business side of their practice."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
