

Press Release

Maine Eye Center Implements Anodyne Health

Atlanta, GA. – October 27, 2009 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced that its business intelligence (BI) solutions were implemented at Maine Eye Center, located in Portland, Maine. Maine Eye Center selected Anodyne's BI solutions for their ability to quickly and easily produce rich visualizations of revenue cycle data streams.

Maine Eye Center is Northern New England's largest practice of eye physicians and surgeons. These providers offer their patients the latest technology and treatment options available. Some of their services include cataract surgery, LASIK, cosmetic procedures, glaucoma treatments, and retina surgery.

Maine Eye Center's Chief Executive Officer, Richard McArdle said, "Maine Eye Center chose Anodyne Health because their solution gives us a user friendly, effective tool to manage and work with our revenue cycle data. This will enable us to conduct more timely data analytics and present the type of graphic visualizations that make trend detection more effective. These factors coupled with the software as a service business model made Anodyne an obvious choice as a partner."

Anodyne's BI tools allow business professionals within physician practices to gain a total command of performance across the entire revenue cycle continuum without the involvement of IT resources. "By utilizing Anodyne's tools, Maine Eye Center will significantly increase the visibility they have into their revenue cycle data. By putting this kind of information at the fingertips of their management team, we will afford them the opportunity to drive continuous improvement into their practice," commented Michael Funk, Chief Executive Officer of Anodyne Health.

About Anodyne Health

Anodyne Health (www.anodynehealth.com) is a leading provider of Business Intelligence (BI) solutions for healthcare provider organizations. The company's unique, easy-to-use, web-based BI software, which includes both an ad-hoc analytics and a dashboard application, revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain. Anodyne's end-to-end solutions are delivered through a low-risk, Software-as-a-Service business model, where the data extraction, hosting, training, support, security, and disaster recovery are all managed by Anodyne.
