

## Press Release

### Ogden Clinic Partners with Anodyne Health

**Atlanta, GA. – June 26, 2009** – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced that its business intelligence (BI) solutions will be implemented at Ogden Clinic, a full-service, multi-specialty clinic. Ogden Clinic was looking for a solution that would assist them in managing their practice more effectively.

Ogden Clinic consists of 40 dedicated physicians that provide care at six different locations in Ogden, Utah. These physicians are armed with state-of-the-art equipment and techniques which guarantee that their patients receive the best care available. Some of their services include: dermatology, general surgery, neurology, orthopedics, radiology, and urology.

Kevin Porter, Chief Operating Officer at Ogden Clinic said, "We believe the Anodyne tool will give us the opportunity to get quick, efficient, and accurate data to enhance our revenue cycle in all aspects of operations. We chose Anodyne because it appears to be very user friendly and intuitive. We wanted to provide a tool to our medical practices and business office personnel where those departments could dig deeper themselves into the questions asked on a routine basis. We felt the value added by this tool would pay for itself in the information that it could provide us as a clinic."

"Anodyne Analytics™ will allow Ogden Clinic to obtain quick and accurate data without relying on technical resources to do the data extractions. This will make them more productive and drastically reduce the interdependency within their organization to answer business questions," stated Michael Funk, Chief Executive Officer of Anodyne Health. "We are excited to be working with such a respected physician group."

#### About Anodyne Health

Anodyne Health ([www.anodynehealth.com](http://www.anodynehealth.com)) is a leading provider of Business Intelligence (BI) solutions for healthcare provider organizations. The company's unique, easy-to-use, web-based BI software, which includes both an ad-hoc analytics and a dashboard application, revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain. Anodyne's end-to-end solutions are delivered through a low-risk, Software-as-a-Service business model, where the data extraction, hosting, training, support, security, and disaster recovery are all managed by Anodyne.
