

## Press Release

### Oregon Health and Science University Medical Group Implements Anodyne's BI Solutions

**Atlanta, GA. – November 24, 2008** – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced today that its business intelligence (BI) solutions were implemented at Oregon Health and Science University (OHSU) Medical Group in Portland, Oregon. OHSU Medical Group was in need of a sophisticated BI solution set for use in their CBO, as well as in each of their clinical departments to assist them in better understanding and improving their revenue cycle process.

OHSU is the only health and research university in the state of Oregon. From once small beginnings, today, OHSU is a world-class teaching hospital and research center that attracts scientists, students, and patients from all over the world. OHSU Medical Group's 851 physicians provide cutting-edge health care to patients at six different locations. With a passion for their community, these providers incorporate the latest medical research, technology, and innovation into their everyday practice to ensure that their patients receive the highest quality of care.

"Anodyne's visual representation of our revenue cycle data is incredible and sold us on the tool immediately. We anticipate using Anodyne's solutions across our enterprise to spot negative financial trends early, and to implement the needed change to correct problems and lessen the financial impact. Using the Anodyne Collections Matched GCR view in the analytical tool will give the CBO the opportunity to show the clinical departments how successful we are in managing the revenue cycle process," stated Matt Navigato, MPH CPC, Chief Operations Officer of the Oregon Health and Science University Medical Group. "Anodyne provides a user friendly interface and gives us the ability to easily export our data into Excel or Adobe for further analysis or distribution. We believe revenue cycle transparency (front end and back end processes) drives communication and collaboration between the CBO and clinical departments which ensures revenue cycle success. The Anodyne BI analytical tool will provide the technology to connect these groups."

"By utilizing both Anodyne Analytics™ and Anodyne Dashboards™, OHSU Medical Group's entire organization will have access to rich graphical visualizations that provide quick identification of trends, patterns, and anomalies, all while minimizing reliance on internal IT resources through our unique "self-service" model," commented Michael Funk, CEO of Anodyne Health. "We are confident that our BI solutions will help drive tremendous value for this top-tier academic organization."

#### About Anodyne Health

Anodyne Health ([www.anodynehealth.com](http://www.anodynehealth.com)) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding, and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk, and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
