

Press Release

Orthopaedic Center of Illinois Partners with Anodyne Health

Atlanta, GA. – August 18, 2009 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, has recently partnered with Orthopaedic Center of Illinois, located in the Springfield area. Orthopaedic Center of Illinois was looking for a solution that would assist them in identifying problems while helping them to drive improved business results.

Orthopaedic Center of Illinois has been serving its community since 1972. To ensure that their patients receive the best care possible, Orthopaedic Center of Illinois only employs Board Certified or Board Eligible physicians. Some of the services that these physicians provide include physical therapy and sports care services, CT services, EMGs, open air MRI, X-ray, and bone density testing.

“We have been looking for a tool to help us manage our denials and monitor our receivables for a couple of years. We looked at several products. Some met our needs but were cost prohibitive, while others just didn't give us the tools we needed to be able to adequately evaluate where our problems were,” said Lori Roethemeyer, Chief Executive Officer of Orthopaedic Center of Illinois. “We looked at the Anodyne product and felt that this offered us the right combination of evaluation tools at a price that seemed reasonable.”

“Anodyne's ad-hoc analysis tools will allow the business users at Orthopaedic Center of Illinois to interact directly with their data without the need for support from IT personnel or analysts. With Anodyne Analytics™, they will be able to more quickly identify revenue cycle opportunities across their entire organization,” commented Michael Funk, Chief Executive Officer of Anodyne Health. “We look forward to working with such a respected physician group.”

About Anodyne Health

Anodyne Health (www.anodynehealth.com) is a leading provider of Business Intelligence (BI) solutions for healthcare provider organizations. The company's unique, easy-to-use, web-based BI software, which includes both an ad-hoc analytics and a dashboard application, revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain. Anodyne's end-to-end solutions are delivered through a low-risk, Software-as-a-Service business model, where the data extraction, hosting, training, support, security, and disaster recovery are all managed by Anodyne.
