

Press Release

Reno Heart Physicians Selects Anodyne Health

Atlanta, GA. – August 7, 2009 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced today that its business intelligence (BI) solutions will be implemented at Reno Heart Physicians, located in Nevada. By utilizing Anodyne's analytics tools, Reno Heart Physicians will gain unparalleled visibility into all areas of their revenue cycle allowing them to manage their organization more effectively.

Reno Heart Physicians employs 22 heart specialists that provide superior cardiovascular care to their patients from two locations. "Reno Heart Physicians has chosen Anodyne to be our reporting partner since we view it as the option with the most clarity and scope among the reporting extract tools available. Managing the practice is becoming increasingly complex due to the fiscal restraints imposed by Medicare and a reporting tool that can show us how to change quickly and efficiently is just what the doctor ordered," stated Dave DeValk, Chief Executive Officer of Reno Heart Physicians.

"We are confident that our solutions can help Reno Heart Physicians increase their revenue and lower their costs, making them more competitive and able to direct more resources to providing even better healthcare for the communities they serve," commented Michael Funk, Chief Executive Officer of Anodyne Health. "We are very excited to be working with such a prestigious group practice."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) is a leading provider of Business Intelligence (BI) solutions for healthcare provider organizations. The company's unique, easy-to-use, web-based BI software, which includes both an ad-hoc analytics and a dashboard application, revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain. Anodyne's end-to-end solutions are delivered through a low-risk, Software-as-a-Service business model, where the data extraction, hosting, training, support, security, and disaster recovery are all managed by Anodyne.
