

## Press Release

### Saltzer Medical Group Partners with Anodyne Health

**Atlanta, GA. – July 21, 2009** – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, recently partnered with Saltzer Medical Group, located in Nampa, Idaho. Saltzer Medical Group chose Anodyne's business intelligence (BI) solutions for their ease-of-use and ability to produce rich revenue cycle data visualizations.

Saltzer Medical Group, a 54 physician practice providing medical services from 12 different locations, has been serving Idaho communities since 1942. With some of the best physicians in the Treasure Valley, Saltzer Medical Group offers a diverse array of medical specialties.

Nancy Powell, Chief Financial Officer of Saltzer Medical Group, said, "We opted to go with Anodyne because we felt the company really understood what an administrator would like to see when analyzing their accounts receivable, production, collections, etc. Our current patient management system reports are too basic and lack the detail we would like to achieve."

Anodyne Analytics™ provides unprecedented visibility into all areas of the revenue cycle. With its unique filtering capabilities, business professionals can analyze their data in ways they never dreamed possible, without the assistance of technical resources.

Michael Funk, Chief Executive Officer of Anodyne Health, said, "The rich presentation of data within our ad-hoc analytics application will enable Saltzer Medical Group to easily spot trends and identify patterns. This insight will allow them to become more competitive and drive better financial results in the ever-changing healthcare environment."

#### About Anodyne Health

Anodyne Health ([www.anodynehealth.com](http://www.anodynehealth.com)) is a leading provider of Business Intelligence (BI) solutions for healthcare provider organizations. The company's unique, easy-to-use, web-based BI software, which includes both an ad-hoc analytics and a dashboard application, revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain. Anodyne's end-to-end solutions are delivered through a low-risk, Software-as-a-Service business model, where the data extraction, hosting, training, support, security, and disaster recovery are all managed by Anodyne.
