St. Vincent Health Chooses Anodyne's BI Solutions

Atlanta, GA. – May 18, 2009 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced today that its business intelligence (BI) solutions will be implemented at St. Vincent Health, located in Indianapolis, Indiana. St. Vincent Health chose Anodyne's business intelligence (BI) solutions for both their interactivity and their ability to quickly produce rich, graphical visualizations of revenue cycle data.

"St. Vincent Health is an organization that has grown from 40 physicians to almost 150 providers in less than four years. That growth has led to difficulties in getting to and providing data and information (financial and revenue cycle) to our users on a timely basis," stated Doug Ricker, Director of Finance at St. Vincent Physician Network.

"We chose Anodyne's BI solutions for several reasons. They offered a great solution to get at both billing and financial data in an easy, streamlined manner," commented Ricker. "We also needed a 'dashboard' to present multiple streams of information to physicians and other users in an easy to understand and quick/easy to compile format. With Anodyne's widgets, we can choose from many standard dashboard offerings, or develop our own easily. Furthermore, it was critical that we didn't have a large capital outlay for BI software, and Anodyne's web-based solution was a great match for our needs. The sixty day 'guarantee' made the decision a no-brainer, and left even the doubting Thomases in our decision group with no real reason to not choose Anodyne."

Anodyne Analytics™ provides unprecedented visibility into all areas of the revenue cycle. With its unique filtering capabilities, business professionals can analyze their data in ways they never dreamed possible, without the assistance of technical resources. Michael Funk, CEO of Anodyne Health said, "Anodyne's BI solutions will give St. Vincent Health a dynamic, new toolset to better analyze and manage their revenue cycle processes. Our highly relevant, pre-tailored content will allow them to quickly capture meaningful insights, thus leading to better decision-making."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding, and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk, and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use, web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
