

Press Release

Thunderbird Internal Medicine Partners with Anodyne Health

Atlanta, GA. – December 23, 2008 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, recently partnered with Thunderbird Internal Medicine located in Glendale, AZ. Thunderbird Internal Medicine chose Anodyne's business intelligence (BI) solutions for both their interactivity and their ability to produce rich data visualizations.

The 15 physicians at Thunderbird Internal Medicine are dedicated to providing quality, personal medical care to their patients. Thunderbird Internal Medicine offers a full range of services including: bone density tests, chest x-rays, pulmonary function tests, colonoscopies, abdominal ultrasounds, and echocardiograms. Alanna Stelzer, Administrator at Thunderbird Internal Medicine stated, "Anodyne Analytics™ is very easy to use. I have the ability to define different data points and drill into them as far as I like, all within a matter of seconds."

Anodyne Analytics™ provides unprecedented visibility into all areas of the revenue cycle. With its unique filtering capabilities, business professionals can analyze their data in ways they never dreamed possible, without the assistance of technical resources. Michael Funk, CEO of Anodyne Health said, "Anodyne's BI solutions will give Thunderbird Internal Medicine a dynamic, new toolset to better analyze and manage their revenue cycle processes. The rich, graphical visualizations will allow them to quickly capture meaningful insights, thus leading to better decision-making."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding, and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk, and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use, web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
