

Press Release

Triangle Orthopaedic Associates Selects Anodyne Health

Atlanta, GA. – January 30, 2009 – Anodyne Health, a leading provider of revenue cycle management solutions for the healthcare industry, announced that its business intelligence (BI) solutions will be implemented at Triangle Orthopaedic Associates, a physician-directed medical practice, located in North Carolina. Triangle Orthopaedic Associates selected Anodyne's BI solutions for their ability to quickly present relevant and accurate revenue cycle data.

Triangle Orthopaedic Associates has been treating patients with musculoskeletal and pain problems for over 54 years. To guarantee that their patients get the highest quality of care, Triangle Orthopaedic Associates' 26 physicians use state-of-the-art medical treatments and services. These providers also participate in clinical trials which allow their patients to access tomorrow's treatments today.

"We chose Anodyne because we would like a better analytical tool that allows us to create reports and get information easily and quickly on the fly. This will help us make more timely and crucial decisions with the monitoring of new providers and/or programs," said George Sheasley, CFO of Triangle Orthopaedic Associates. "Also, we are expecting to improve communications with providers by allowing them access to their individual data. To be able to look at their dashboards and get updates will be very informative to them, and serve as an incentive for them to keep up with their peers, which will improve the bottom line of the corporation as a whole as well."

"Our cutting-edge BI solutions will make Triangle Orthopaedic Associates infinitely more productive while dramatically reducing the interdependency within their organization to answer business questions, both simple and complex," stated Michael Funk, CEO of Anodyne Health. "We are pleased to add another highly respected provider organization as an Anodyne client."

About Anodyne Health

Anodyne Health (www.anodynehealth.com) delivers revenue cycle solutions to healthcare provider organizations including physician billing, medical coding, and business intelligence software. The company's billing solution helps practices collect more revenue, minimize compliance risk, and gain a deeper understanding into the business side of their practice. Anodyne's unique, easy-to-use, web-based business intelligence software revolutionizes access to revenue cycle information that was once thought difficult, or even impossible, to obtain.
